To Whom It May Concern:

Internal Certificate of Compliance

This certificate affirms that our Magickwoods line of kitchen cabinets meets and surpasses industry standards, particularly ANSI/KCMA 161.1, even in the absence of a formal certification. We work diligently to exceed these criteria, as part of our commitment to quality.

Our confidence in this compliance arises from our meticulous sourcing of components. The parts we acquire are supplied by manufacturers who utilize them in their own certified kitchen lines. Furthermore, all other raw materials and hardware selected for our cabinets adhere to the most stringent industry requirements.

In terms of construction, our frameless cabinets are a testament to our dedication to quality. We employ a robust assembly method involving dowels and adhesive at every joint, ensuring structural integrity that goes above and beyond any resistance requirements.

Our dedication to quality is underscored by our rigorous quality protocols at every step, from raw material sourcing to the production of finished goods. We support our products with a lifetime warranty, which demonstrates our unwavering confidence in maintaining industry-leading standards.

This internal certificate attests to our commitment to delivering best-in-class quality products and surpassing industry standards.

Sincerely,

A handwritten signature in black ink, appearing to read "Antonio Negrao", with a stylized flourish at the end.
